## CONFLICT OF INTEREST IN RESEARCH

At WVU, individuals who are conducting their own research or are helping others with their research projects are asked to answer questions about any activities that could possibly produce a conflict of interest in their research activities.

Anyone who is developing a new IRB protocol within the KC system or bringing an existing protocol into the system from BRAAN should complete a conflict of interest form and add it to the “Personnel” tab of the KC protocol for each investigator.

### WVU Investigators

- Complete the form at: <http://oric.research.wvu.edu/conint/disclosure-of-interest-in-research>
- Once completed, save the form to your desktop and use it for other protocols throughout the year, UNLESS certain aspects of your other partnerships or financial condition has changed.

### Non-WVU Investigators

- Any investigators listed on your research project who are not affiliated with WVU, should complete the disclosure form at: <http://oric.research.wvu.edu/conint/disclosure-of-interest-in-research-doir-form-for-non-wvu-affiliated-investigators>
- These can also be renewed annually unless circumstances have changed
