

The background features abstract, overlapping geometric shapes in various shades of blue, primarily on the right side, set against a white background.

Clinicians

Clinicians at work

- ▶ Clinicians want to make their patients as healthy as they can be
- ▶ Concerned about issues in their practice and community, but are busy seeing patients to investigate in depth
- ▶ Strengths are reaching and providing care to populations in need and discovering issues/trends specific to a localized area

Role of research among clinicians

- ▶ Provide quality improvement strategies in clinician's scope of practice
- ▶ Advance their academic knowledge
- ▶ Make the clinician's practice more efficient
- ▶ Provide input from the community to improve the practice to better serve them
- ▶ Provide opportunity for partners to work together on future projects
- ▶ Allow a connection with the community on a personal basis

How do partnerships with researchers benefit clinicians?

- ▶ Researchers help clinicians by...
 - ▶ Assisting in identifying areas of interest and need
 - ▶ Providing assistance to secure funding
 - ▶ Helping to recruit other clinicians to join in the efforts
 - ▶ Organizing research methods and data collection
 - ▶ Developing strategies to improve their quality of care based on research
 - ▶ Helping to share findings to and for the clinicians

How do partnerships with communities benefit clinicians?

- ▶ Communities help clinicians by...
 - ▶ Identifying health priority issues
 - ▶ Providing input into health disparity issues that need addressed
 - ▶ Offering an inlet to community's trust and voice
 - ▶ Sharing opinions about research methods and design
 - ▶ Identifying potential organizational partners
 - ▶ Sharing in active participation and ownership of the project
